DTTT PROJECT REPORT

OnBoardPro – Employee Onboarding Management App

Team Members	1. Faaiz Kadiwal (21K-3830) 2. Hasan Amir (21K-3802) 3. Anser Tayyab (21K-3909)
Course Instructor	Mr. Muhammad Mustajab
Submission Date	14-June-2025

1. Project Idea

- **Objective:**

OnBoardPro is a centralized employee onboarding management solution built using Microsoft Power Platform. It streamlines the assignment of projects, access rights, and equipment to new employees, ensuring a structured and auditable process.

- **Scope:**

Designed for HR, IT, and Project departments, the system automates onboarding tasks, tracks equipment handovers, grants system access, and ensures compliance with pre-set workflows.

2. Business Value

OnBoardPro delivers tangible business value across multiple dimensions of the employee onboarding process. The solution not only improves operational efficiency but also enhances visibility, control, and user experience across HR and IT departments.

1. Process Efficiency and Automation

- **Auto-filled Dates:** Fields such as joiningDate, dueDate, endDate, and issuedDate are automatically populated using business rules or Power Automate, minimizing manual entry and human error.
- **Auto-assignment Logic:** Tasks and equipment are linked to employees with minimum clicks, speeding up onboarding workflows.
- **Reduced Admin Burden:** Manual calendar tracking, email drafting, and field updates are replaced by automated flows, saving HR/IT time.

2. Enhanced Visibility and Tracking

- **Dashboards with Charts:** Visual summaries (e.g., Tasks by Status, Projects by Department, Equipment by Type) allow managers to monitor onboarding metrics in real time.
- **Integrated Reporting:** Built-in reports like Pending Tasks by Project provide data-driven insights for continuous process improvement.

- **View-based Access:** Users can filter data by views (e.g., active tasks, current employees), making information access quick and role-appropriate.

3. Security and Access Control

- **Duplicate Prevention:** Built-in duplicate detection rules (e.g., unique usernames in FK_AccessRights) enforce data integrity.
- **Custom Security Roles:** Role-based access (e.g., Admin) ensures data and feature access are controlled in a multi-user environment.
- **Access Assignment Emails:** Users are automatically notified when access rights are assigned, maintaining audit-ready communication.

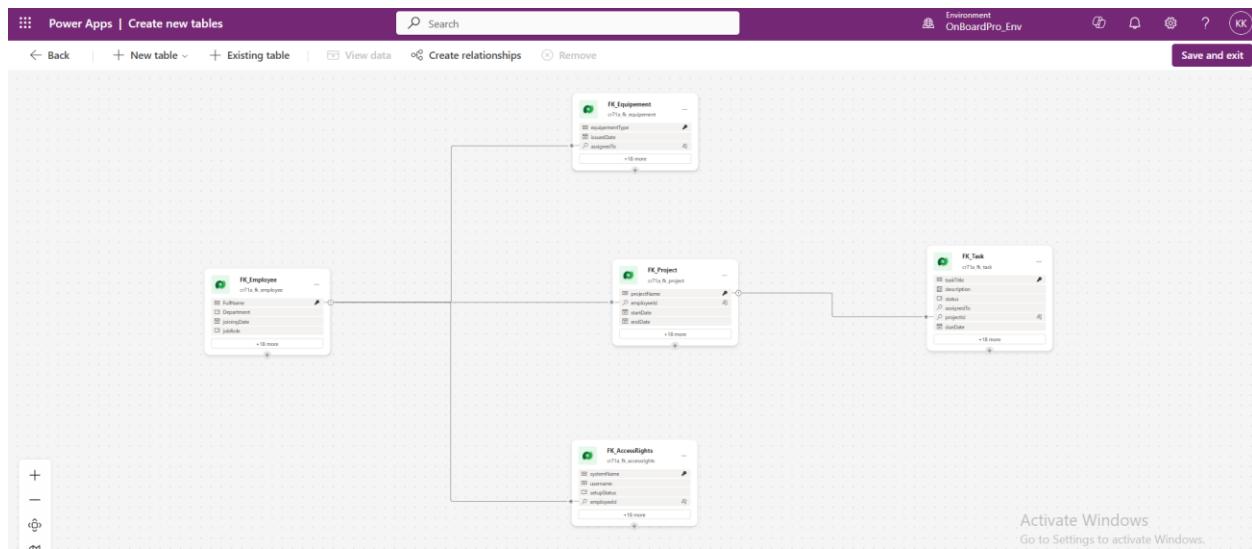

4. Scalability and Reusability

- **Modular Table Design:** Dataverse tables (Employee, Task, Project, Equipment, AccessRights) can be reused or extended across departments or onboarding phases.
- **Reusable Flows:** Each automation (Power Automate) is standalone and editable for future enhancements or other business processes.

5. Professional Presentation and Maintainability

- **Clean UI:** Well-structured model-driven app with clean forms, subgrids, and organized layout makes it intuitive for users.
- **Auditable System:** Changes to records (created on, modified on, owner) are tracked for transparency and compliance.
- **Documentation Ready:** The app is packaged in a managed solution with proper naming conventions, making it ready for portfolio showcase or deployment.

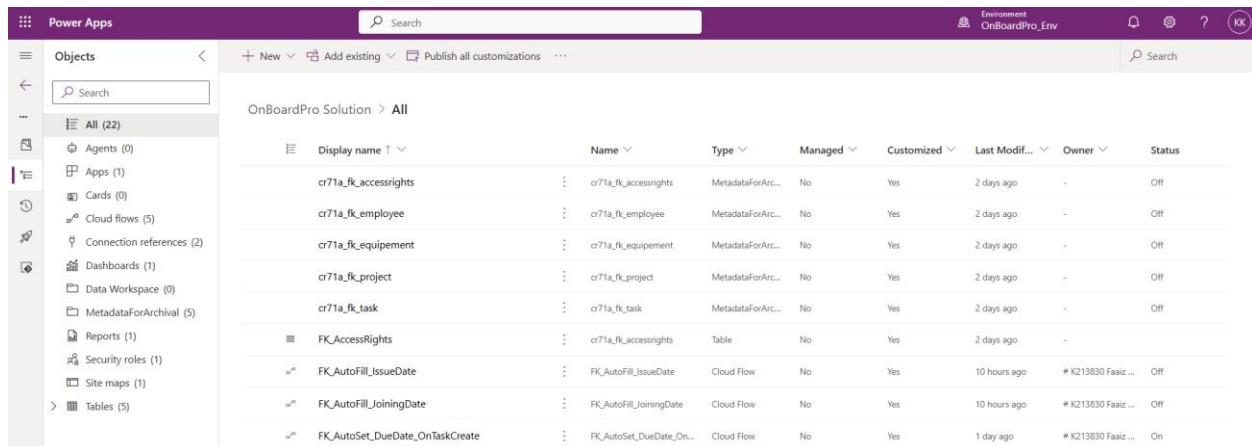

3. ERD (Entity Relationship Diagram)

- **Relationships:**

FK_Employee and FK_Project	One to Many (1 : N)
FK_Project and FK_Task	One to Many (1 : N)
FK_Employee and FK_Equipment	One to Many (1 : N)
FK_Employee FK_AccessRights	One to Many (1 : N)

4. Solution Architecture Diagram

5. Solution Snapshots

- **Data Layer (Dataverse)**

- **Tables Created:** FK_Employee, FK_Project, FK_Task, FK_Equipment, FK_AccessRights

The screenshot shows two views of the Power Apps Studio interface for the 'OnBoardPro Solution'.

Top View (Tables List): Shows a list of five tables: FK_AccessRights, FK_Employee, FK_Equipement, FK_Project, and FK_Task. The 'FK_AccessRights' table is highlighted.

Table	Name	Type	Managed	Customized	Customizable	Tags
FK_AccessRights	cr71a_fk_accessrights	Standard	No	Yes	Yes	Custom
FK_Employee	cr71a_fk_employee	Standard	No	Yes	Yes	Custom
FK_Equipement	cr71a_fk_equipement	Standard	No	Yes	Yes	Custom
FK_Project	cr71a_fk_project	Standard	No	Yes	Yes	Custom
FK_Task	cr71a_fk_task	Standard	No	Yes	Yes	Custom

Bottom View (FK_AccessRights Detail): Shows the properties, schema, data experiences, and customizations for the FK_AccessRights table. It also displays a grid of data for the 'FK_AccessRights' table.

Name	Primary column	Description	Properties	Schema	Data experiences	Customizations
FK_AccessRights	systemName			Columns Relationships Keys	Forms Views Charts Dashboards	Business rules Commands Row summary
Type	Last modified					
Standard	2 days ago					

Data Grid (FK_AccessRights):

The screenshot shows the Microsoft Power Apps portal interface. On the left, the navigation pane is open, showing various objects like Charts, Dashboards, Business rules, and Commands. Under 'Tables', 'FK_Task' is selected. The main content area displays the 'FK_Task' table properties, including its name (FK_Task), primary column (taskTitle), type (Standard), and last modified date (2 days ago). It also shows sections for Schema (Columns, Relationships, Keys), Data experiences (Forms, Views, Charts, Dashboards), and Customizations (Business rules, Commands, Row summary).

- **Relationships:** 1:N and N:1 among all tables properly configured

The screenshot shows the Microsoft Power Apps portal interface. On the left, the navigation pane is open, showing various objects like Cards, Cloud flows, Connection references, Dashboards, Data Workspace, MetadataForArchival, Reports, Security roles, Site maps, and Tables. Under 'Tables', 'FK_AccessRights' is selected. The main content area displays the 'Relationships' section for 'FK_AccessRights', listing various relationships such as 'Base Record ID', 'Connected From', 'Connected To', 'Created By', 'Created By (Delegate)', 'Duplicate Record ID', 'employeed', 'Entity instance', 'Modified By', 'Modified By (Delegate)', 'Name', and 'Object'. Each relationship is defined by a name, related table, relationship type (e.g., One-to-many, Many-to-one), and managed status.

- **Duplicate Detection:** Enabled on username in FK_AccessRights

The screenshot shows a Power Apps form for 'New FK_AccessRights'. A modal dialog titled 'Duplicate records found' is displayed, asking if the user wants to save the record anyway. The dialog lists a single duplicate record found in 'FK_AccessRights' with systemName 'Flex' and username 'arshrahim395@gmail.com'. At the bottom of the dialog are 'Ignore and save' and 'Cancel' buttons.

- **Column Naming:** All fields follow clear naming conventions

• Forms & Views

▪ Main Forms: Professionally sectioned for all 5 tables

The image displays three separate screenshots of Power Apps forms, each showing a 'Table columns' pane on the left and a main form editor on the right.

- Screenshot 1: New FK_AccessRights**

 - Table columns pane:** Shows columns: Created By, Created On, Email Address, Modified By, Modified On, msft_DataState, Owning Business Unit, Status, Status Reason.
 - Main form editor:** Sectioned into 'Access Details'. Fields include systemName, employeeId, username, setupStatus, Owner (FK_Employee), jobRole, and joiningDate.
 - Properties pane:** Table: FK_AccessRights, Display Name: Information, Description: A form for this entity, Max Width (pixels): 1,920, Show image checked.

- Screenshot 2: New FK_Employee**

 - Table columns pane:** Shows columns: Created By, Created On, Email Address, Modified By, Modified On, msft_DataState, Owning Business Unit, Status, Status Reason.
 - Main form editor:** Sectioned into 'Employee Information' (FullName, Department, jobRole, joiningDate) and 'Linked Records' (Assigned Project). The Assigned Project section includes projectName, employeeId, startDate, endDate, Status, and Created By.
 - Properties pane:** Table: FK_Employee, Display Name: Information, Description: A form for this entity, Max Width (pixels): 1,920, Show image checked.

- Screenshot 3: New FK_Equipement**

 - Table columns pane:** Shows columns: Created By, Created On, Email Address, Modified By, Modified On, msft_DataState, Owning Business Unit, Status, Status Reason.
 - Main form editor:** Sectioned into 'Equipement Detail'. Fields include equipementType, assignedTo, issuedDate, owner, and assignedTo.
 - Properties pane:** Table: FK_Equipement, Display Name: Information, Description: A form for this entity, Max Width (pixels): 1,920, Show image checked.

● Power Automate Flows

The screenshot shows the Power Apps portal interface. In the left sidebar under 'Objects', 'Cloud flows (5)' is selected. The main area displays a table of five cloud flows:

Display name ↑	Name ↓	Type	Managed	Customized	Last Modif...	Owner	Status
FK_AutoFill_IssueDate	FK_AutoFill_IssueDate	Cloud Flow	No	Yes	19 hours ago	# K213830 Faailz ...	Off
FK_AutoFill_JoiningDate	FK_AutoFill_JoiningDate	Cloud Flow	No	Yes	19 hours ago	# K213830 Faailz ...	Off
FK_AutoSet_DueDate_OnTaskCreate	FK_AutoSet_DueDate_OnT...	Cloud Flow	No	Yes	2 days ago	# K213830 Faailz ...	On
FK_SendAccessEmail_OnCreate	FK_SendAccessEmail_OnCr...	Cloud Flow	No	Yes	18 hours ago	# K213830 Faailz ...	On
FK_Set_EndDate_OnStart	FK_Set_EndDate_OnStart	Cloud Flow	No	Yes	22 hours ago	# K213830 Faailz ...	Off

■ Auto-fill issueDate in FK_Equipments

The screenshot shows the details page for the 'FK_AutoFill_IssueDate' flow. The 'Details' section includes:

- Flow: FK_AutoFill_IssueDate
- Primary owner: # K213830 Faailz Kadiwal
- Status: Off
- Created: Jun 14, 02:18 AM
- Modified: Jun 14, 02:39 AM
- Type: Automated
- Plan: This flow runs on owner's plan

The '28-day run history' table shows one successful run on Jun 14, 02:22 AM (19 h ago).

The 'Connection references' section lists 'Microsoft Dataverse OnBoardPro' with owner 'K213830 Faailz Kadiwal'.

The 'Flow runs error trends (last 7 days)' chart shows one error on Jun 14.

The screenshot shows the Power Automate flow designer. The flow consists of two main steps:

- When a row is added, modified or deleted** (trigger):
 - Change type: Added
 - Table name: FK_Equipements
 - Scope: Organization
 - Select columns: Enter a comma-separated list of column unique names. The flow triggers if any.
 - Filter rows: Odata expression to limit rows that can trigger the flow, e.g. statecode eq 0
- Update a row** (action):
 - Table name: FK_Equipements
 - Row ID: FK_Equipment
 - assignedTo (FK_Employees)
 - equipementType

At the bottom, there are buttons for '+ New step', 'Save', and 'Activate Windows'.

- Auto-fill joiningDate in FK_Employee

The screenshot shows the 'Details' section of a Power Apps Flow named 'FK_AutoFill_JoiningDate'. The flow is currently off. It was created by 'K213830 Faailz Kadiwal' on Jun 14, 01:58 AM, and modified on Jun 14, 02:23 AM. The type is 'Automated', and the plan is 'This flow runs on owner's plan'. The 'Connection references' section shows a Microsoft Dataverse connection named 'OnBoardPro_Env' with the owner being 'K213830 Faailz Kadiwal'. The '28-day run history' section shows three successful runs on Jun 14, with durations of 00:00:02, 319 ms, and 237 ms respectively. The 'Flow runs error trends (last 7 days)' chart shows 4 errors on Jun 14. The 'Solutions' section indicates that no solutions have been created.

The screenshot shows the Power Apps Flow designer interface. It displays two steps in sequence: 'When a row is added, modified or deleted' (trigger) and 'Update a row' (action). The trigger step is configured to trigger on 'Added' changes to the 'FK_Employees' table within the 'Organization' scope. The action step is configured to update the 'FK_Employees' table, specifically setting the 'joiningDate' column to the current date ('Now()') for the row identified by the 'Row ID' (FK_Employee).

- Auto-fill dueDate in FK_Task

Draft

- Duplicate username logic

The screenshot shows the Dynamics 365 Data Management interface. The top navigation bar includes 'Dynamics 365', 'Settings', 'Data Management', and various system icons. A yellow banner at the top says 'Enable Server-Based SharePoint Integration' with a 'Enable Now' button.

The main area displays 'Duplicate Detection Rules'. The table lists rules categorized by entity type (e.g., Accounts, Contacts, Social profiles) and matching criteria (e.g., same Account Name, e-mail address, phone number, website). The first few rows are:

Entity Type	Rule Name	Status Reason	Base Record Type	Matching Record Type	Created By	Modified On
All	Accounts with the same Account Name	Published	Account	Account	# K213830 Faiz Kadiwal	6/7/2025 5:16 AM
All	Accounts with the same e-mail address	Published	Account	Account	SYSTEM	6/7/2025 5:16 AM
All	Accounts with the same phone number	Published	Account	Account	SYSTEM	6/7/2025 5:16 AM
All	Accounts with the same website	Published	Account	Account	SYSTEM	6/7/2025 5:16 AM
All	Contacts with the same business phone number	Published	Contact	Contact	SYSTEM	6/7/2025 5:16 AM
All	Contacts with the same e-mail address	Published	Contact	Contact	SYSTEM	6/7/2025 5:16 AM
All	Contacts with the same first name and last name	Published	Contact	Contact	SYSTEM	6/7/2025 5:16 AM
All	FK_DuplicationDetectionRule	Published	FK_AccessRights	FK_AccessRights	# K213830 Faiz Kadiwal	6/12/2025 2:36 AM
All	Social profiles with same full name and social ch...	Published	Social Profile	Social Profile	SYSTEM	6/7/2025 5:16 AM

Below the table, a specific rule is selected: 'Duplicate Detection Rule: FK_DuplicationDetectionRule'. The details pane shows:

- General:** Name: FK_DuplicationDetectionRule, Status Reason: Published.
- Related:** Common, System Jobs, Audit History.
- Duplicate Detection Rule Criteria:**
 - Base Record Type: FK_AccessRights
 - Matching Record Type: FK_AccessRights
 - Case-sensitive: checked
 - Exclude inactive matching records: checked

Field	Criteria	No. of Characters	Ignore Blank Values
username	Exact Match		<input checked="" type="checkbox"/>
Select			

At the bottom right, there are links for 'Activate Windows' and 'Status: Active'.

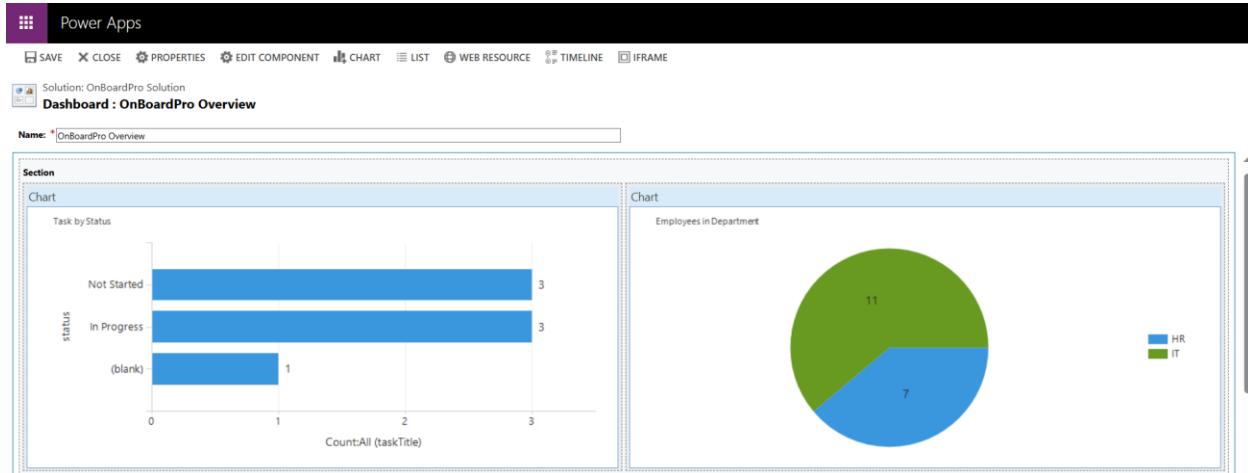

- Dashboards & Visuals:

- Custom Dashboard: "OnBoardPro Overview"

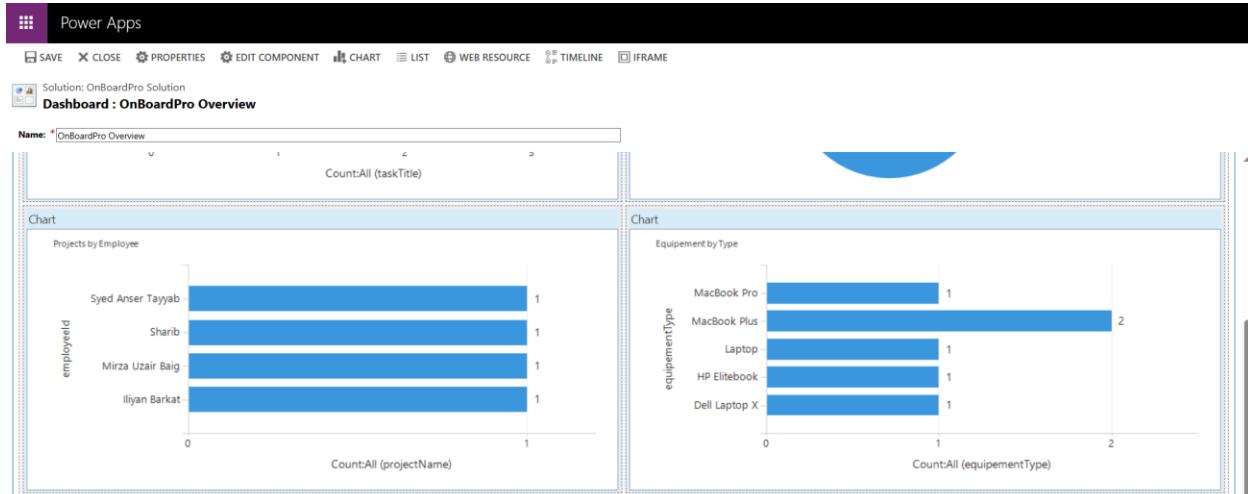

The screenshot shows the Power Apps Objects page under the 'Dashboards' category. The left sidebar lists objects like Agents, Cards, Cloud flows, and Connection references. The main area shows the 'OnBoardPro Solution > Dashboards' section with a table of dashboards:

Display name	Name	Type	Managed	Customized	Last Modif...	Owner	Status
OnBoardPro Overview	OnBoardPro Overview	Dashboard	No	Yes	-	-	On

- Tasks by Status (Chart)
- Projects by Department (Chart)

- Equipment by Type (Chart)
- Employee View (List)

- **Reports:** One report "Pending Tasks by Project" created and saved

The screenshot shows the Microsoft Power Apps portal interface. On the left, there's a navigation pane titled 'Power Apps' with a search bar. Below it, under 'Objects', there's a list of items including 'All (22)', 'Agents (0)', 'Apps (1)', 'Cards (0)', 'Cloud flows (5)', 'Connection references (2)', 'Dashboards (1)', 'Data Workspace (0)', 'MetadataForArchival (5)', and 'Reports (1)'. The 'Reports (1)' item is highlighted. In the center, the main content area shows the 'OnBoardPro Solution > Reports' section. A table lists one report: 'Pending Tasks by Project' (Type: Report, Managed: No, Customized: Yes, Last Modified: 10 hours ago, Owner: # K213830 Faailz ...). At the bottom, there's a detailed configuration page for the 'Report: Pending Tasks by Project'. The page has tabs for 'General' and 'Administration'. Under 'Source', 'Report Type' is set to 'Report Wizard Report' with a link to 'Report Wizard'. Under 'Details', 'Name' is 'Pending Tasks by Project' and 'Description' is 'Lists all pending tasks grouped under their associated projects'. Under 'Parent Report', there's a field for 'Parent Report'. Under 'Categorization', 'Categories' is 'FK_Tasks', 'Related Record Types' is 'FK_Tasks', 'Display In' is 'Forms for related record types: Lists for related record types: Reports area', and 'Languages' is 'English'.

Environments

An environment is a space to store, manage, and share your organization's business data, apps, chatbots, and flows. When an environment is managed, it allows you greater visibility and control.

Environment	Type	State	Dataverse	Managed	Region	Release Cycle	Group
OnBoardPro_Env	Developer	Ready		Yes	No	Asia	Standard

The screenshot shows the Power Platform admin center interface. On the left, there's a navigation sidebar with sections like Home, Environments, Billing, Resources, Data integration, Data (preview), Policies, and Admin centers. The main area displays environment details for 'OnBoardPro_Env'. It includes fields for Environment URL (org164b48bb.crm5.dynamics.com), State (Ready), Region (Asia), Refresh cadence (Frequent), Type (Developer), Security group (Not assigned), Organization ID (1dfa6e5-dc46-f011-be53-000d3ac6da89), and Environment ID (6b712d4f-0445-ede9-bd95-05bdf732e596). Below this, there are tabs for Version (Dataaverse version 9.2.25054.180), Managed environments (No), and Updates (2025 release wave 1, On). To the right, there are sections for Access (Security roles, Teams, Users, S2S apps, Business units) and Resources (Power Pages sites, Power Apps, Flows).

- **Model-Driven App Created: All tables, dashboards, and components included**

The screenshot shows the Power Apps studio interface. The top navigation bar indicates the environment is 'OnBoardPro_Env'. The left sidebar lists objects (Objects, Search, All (22), Agents (0), Apps (1), Cards (0), Cloud flows (5)). The main area shows the 'OnBoardPro Solution > Apps' list, where 'OnboardPro' is listed as a Model-Driven App. The bottom part of the screen shows the 'Power Apps | OnBoardPro' dashboard, which includes a navigation menu with items like Home, Recent, Pinned, New Group, and New. The main content area displays a chart titled 'OnBoardPro Overview' showing 'Active FK_Tasks' by status: Not Started (3), In Progress (3), and (blank) (1). A message at the bottom right says 'Activate Windows Go to Settings to activate Windows.'
